

How to print this book

You are allowed to print one copy of the book for private purposes.

The book is stored in pdf format with a page size of 18.9 X 24.6 cm (7.44" X 9.7").

The first page and the last page form the cover of the book.

It is suggested that the spine text will be: (Author: Title)

"Ir J.A.J. van Leunen: On the Origin of Physical Dynamics"

Several internet located services can print this book.

An example is www.ezbook.nl. For that service the conforming book format is called "scientific". You must state that the book front cover and the book back cover are part of the supplied document.

Usually you pay a price for delivery and for printing. The price depends on the selection of paper quality, paperback or hardcover, black&white or full color. Full color is about four times more expensive.

After upload and the selection of preferences the price (without delivery) will be shown.

The most modest choice amounts about ten euro cent per page.

I also managed to print the book on Lulu, however in that case the book pdf must be stored in a different way. The first edition appeared under the title: The Hilbert Book Model, with isbn: 978-1-4709-9876-9 (Black and white). A Full color version appeared at Lulu under the title "On the Origin of Physical Dynamics".

The book is suitable for e-readers, but formulas may cause problems with e-readers below 9".
